DiseaseINFOPACK

Foot-and-mouth disease

October 2007

Abstract

DiseaseINFOPACK: *Foot-and-mouth disease*

CAT No: VADIP002, published October 2007

REPORT ABSTRACT:

Foot-and-mouth disease is a highly contagious disease of cloven-hoofed animals caused by a single-stranded RNA virus of the *picornaviridae* family. Although disease mortality is quite low, the virus can cause considerable discomfort and distress to infected animals and spread very rapidly. The most significant feature of foot-and-mouth disease is its devastating economic impact with the cost of the 2001 UK epidemic estimated between \$12-13 billion. This **DiseaseINFOPACK** report is an expert review of the current literature providing the reader with a full easy-to-read overview of the pathogen, its epidemiology, through to its clinical and economic impact. The report places a focus on the history of vaccination, current vaccine policy and discusses the future outlook in terms of new preventative strategies.

PAGES: 44

Table of contents

| | |
|-----------------------------|---|
| Executive Summary | Epidemiology – Incidence (EU) |
| The Pathogen | Epidemiology – Incidence (UK) |
| Global Distribution | Serotype O PanAsia |
| Transmission (1) | Economic Impact (1) |
| Transmission (2) | Economic Impact (2) |
| Pathogenesis (1) | Prevention and Control |
| Pathogenesis (2) | Vaccination and FMD |
| Diagnosis | History of FMD Vaccination |
| Host Response | Current Vaccination Policy |
| Risk Factors | Broad Vaccination Strategy |
| Diagnosis | Steps During Emergency Vaccination (1) |
| Clinical Outcome | Steps During Emergency Vaccination (2) |
| Pathology | Post Vaccination Serological Survey |
| Morbidity/Mortality | Vaccination Case Study – Netherlands 2001 |
| Treatment | Resistors to Vaccination |
| Epidemiology - Surveillance | Summary Disease Trends and Dynamics |
| | Opportunity for New Vaccines |

About VacZine Analytics:

VacZine Analytics is a brand new research consultancy based in the United Kingdom. Its aim is to provide high-quality disease and commercial analysis to those working within or in collaboration with the vaccine industry.

With our product lines:

- DiseaseINFOPACK
- OpportunitySCAN
- MarketVIEW
- ExpertREACT
- VaccineSTATS

Our key focus is helping clients to build the case for developing new vaccines.
